

Missionary Fellowship of Kenya

This is the main church of the Missionary Fellowship of Kenya with which I worked for 20 years and their Director Rev Patrick Okumu who was very kind to me and gave me such opportunity to minister in their churches. There were many miracles in that time and some among his family.

1. One of his daughters had a daughter but in African culture the daughter lived with the grandmother. Patrick's daughter had been so damaged in childbirth in the hospital that she was unable to conceive more children. We went to visit her and unusually for

an African lady she cried. Her only child was not in her home. "Give me children or I die". We prayed and afterwards she had at least 2 more children, all normal and all fit and healthy and the first child soon after the prayer. Praise God.

2. Phares is a son of Rev Okumu and on the way from Kisumu to Bungoma I was shown 2 hospitals in which Phares had been treated for Amoebic Dysentery in the recent weeks, but he was still not well. As I was unpacking a knock on my door and "Uncle please will you pray for me". As we prayed the power of God went through Phares and he was instantly healed and has never had the problem again.
3. When I was last in Bungoma in 2017 Phares' son was very ill. Again, we prayed, and he changed from the moment he was prayed for and was a normal child from that time onwards.
4. Again in 2017 a lady came up to me in a meeting and thanked me for praying for her healing. I had never met her before, but she explained that in the first meeting her husband had come forward for healing for her and I had prayed for him representing her. It happens quite often, and she had been healed and was well.
5. An elderly lady, in a church just outside Bungoma, who was very deaf, and someone came with the lady for prayer to say she cannot hear you as she is very deaf. We prayed and after the meeting she said to me "I can hear you much better now you have prayed for me."
