

The Lady in North Tanzania and other miracles

There is no actual photo of these visits as some while before digital camera available, so the flag used.

The lady was healed at the same time that we experienced an earthquake in the night which woke us all up and eventually filled my mosquito net with little ants. The earth moved and God moved too, and the noise of the earthquake was like being in the London Underground and one could feel the waves as the earth moved.

The church was in the rural area about 20-30 km from Tarime and many came for prayer at the end of the meeting. This beautiful lady moved back her head shawl to show two large growths under her jaw. One each side. Probably about 2 inches long. Praying for them to be removed, at first the thought was of holes being they were but then the thought came to pray they would shrink away. That is what was prayed, and I had reports from the pastor who took us there over the next 3 weeks that the growths were shrinking and then when they had gone altogether. It was a testimony to her friends and neighbours who could see the work of God on their friend and his removal of her growths.

Also, in the same area on another visit we prayed for over 40 people in about 15-20 minutes as time was short and we needed to get back through the border to Kenya that night. Among the many healed were 3 boys with Bilharzia. It is a disease which gets in through the skin in stagnant water and is often fatal. God healed the boys and gave them life.
